

The NSF-STEP Program *and the* Science Club

presents

Variation in Sensory Structures of the Northern
Scorpion *Paruroctonus boreus* using SEM

A presentation by Abraham Miller

Event: NSF-STEP Guest Lecture Series

Date: Wednesday, April 16, 2008

Time: 12:00pm - 1:00pm

Eastfield College

3737 Motley Drive, Room C-135A

Mesquite, TX 75150

Abraham Miller

is a Ph.D. candidate at the University of Texas at Arlington with an anticipated graduation date of August, 2008.

Miller's research examines the geographic variation in morphology and the behavior of *Paruroctonus boreus*.

Miller received his B.S. degree from West Texas A&M University and his Honors degree (Master's equivalent) from the University of Tasmania in Australia.
